DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 1-30-2006 with respect to claims 43-49 have been fully considered but they are not persuasive.

Applicant argues that claims 43-49 are "a signal claim." However, a signal claim refers to a computer readable storage media including instructions performing predefined functions. The claims are drawn to a data structure which does fall into any of categories of patentable subject matter.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 8,9,12,14,29,30,33,35,43,44,46,48,49 are rejected under 35 U.S.C. 102(e) as being anticipated by Rabinowitz (US 2002/0144294).

Claims 8,9,12,14,29,30,33,35.

Rabinowitz discloses a wireless communication transmitter and method, comprising; producing a data signal and

Application/Control Number: 10/040,173 Page 3

Art Unit: 2611

producing a pilot signals, i.e. "a time-varying signal" that changes frequency during each of a plurality of periods in a predetermined sequence within a channel, and producing a transmission signal from the sum of the data signal and the time-varying signal.

See paragraph [0092] describing the pilot signal frequency changes in a predetermined sequence by frequency hopping, and note that in an OFDM, such as used in Rabinowitz, pilot tones are transmitted simultaneously with data tones.

Claims 43,44,46,48,49.

Rabinowitz discloses a wireless communication, wherein a transmission signal comprises;

a data signal and

a pilot signals, i.e. "at least one supplemental signal" on a frequency that changes during each of a plurality of periods in a predetermined sequence, and

See paragraph [0092] describing the pilot signal frequency changes in a predetermined sequence by frequency hopping, and note that in an OFDM, such as used in Rabinowitz, pilot tones are transmitted simultaneously with data tones.

Allowable Subject Matter

4. Claims 1-7,15-28,36-42 are allowed.

Application/Control Number: 10/040,173 Page 4

Art Unit: 2611

5. Claims 10,11,13,31,32 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Y. Kim whose telephone number is 571-272-3039. The examiner can normally be reached on 8AM --5PM M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
